Education

Bachelor of Science (Honours) – Computer Science, Co-op

Sept 2020 – June 2026

With First-Class Standing

Concentration in Software Engineering and Concentration in Artificial Intelligence

Brock University, St. Catharines, ON

Technical Skills

- Programming languages
 - C#, C++, C, Java, Python, PHP, JavaScript
- Web development & frameworks
 - HTML, CSS, jQuery, .NET, React
- Data & analytics
 - SQL, XML, Power BI, Tableau
- Tools & concepts
 - Git, Linux, Node.js, Agile & Scrum, Object-oriented programming, Software testing, Machine learning

Work Experience

Junior Technical Analyst (Co-op)

Jan 2025 – Aug 2025

Labour and Transportation I&IT Cluster, Ministry of Public and Business Service Delivery and Procurement, St. Catharines, ON

- Assisted with development and maintenance of full-stack applications for clients, while also assessing existing projects to ensure AODA guideline compliance
- Led research and design for the modernizing and rebuilding of a legacy .NET application
- Helped to train a newly hired co-op student in May, leading to minimal downtime and maximized efficiency as well as leaving detailed documentation for those that would come after

Software Developer (Co-op)

May 2024 – Dec 2024

Universal Automation Systems, Hamilton, ON

- Developed and maintained .NET software solutions for client applications in collaboration with senior developers
- Quickly learned jQuery and XML to support ongoing maintenance of legacy applications
- Proactively implemented new features into applications to better fit user needs based on client feedback and project requirements
- Improved client satisfaction by helping to complete project milestones before deadlines

Computer Programmer and Interactive Media Developer (Co-op)

Sept 2022 – Dec 2022

Caribou, Thorold, ON

- Applied knowledge of HTML, CSS, and JavaScript to fix bugs in, and make optimizations to, the website's source code
- Worked through all the phases of the SDLC in order to add various user-requested features to the website
- Made company outreach easier by developing a web scraper to obtain lists of educators' emails

Junior Data Science Developer (Co-op)

Jan 2022 – Apr 2022

Labour and Transportation I&IT Cluster, Ministry of Transportation, St. Catharines, ON

- Collaborated with the rest of the Digital Garage team in weekly sprints using an Agile approach to streamline progress
- Helped to finish the MLTSD 360 project ahead of schedule through rapid development of effective test cases
- Utilized Power BI to create dashboards and tested dashboards to ensure efficient data flow
- Boosted productivity across multiple departments and gained experience in project management by working with others to create analytics showing where time was being spent

Computer Sales and Support Associate (Specialist High Skills Major Co-op)

July 2019 – Aug 2019

Wintronic Computers, St. Catharines, ON

- Reduced customer wait times by repairing damaged electronics and devices
- Recorded revenue and improved personal accountability by performing cash balancing duties while paying close attention to detail and reducing input errors
- Built custom computers to customer specifications, including hardware assembly, operating system installation and configuration
- Improved customer satisfaction by providing excellent customer service; helping customers find items, answering technical questions, recommending products, and assisting with check-out

Personal & Academic Projects**Ant Colony Optimizer for the Traveling Salesman Problem**

- Implemented and evaluated an ant colony optimization algorithm in Python to efficiently approximate solutions to the Traveling Salesman Problem, comparing generated solution quality to known optimal solutions

Chess Robot

- Designed, built, and programmed an autonomous chess-playing robot using computer vision to detect board state and a motorized claw system to execute moves

Feed-Forward Neural Network for Classifying Data

- Built and trained a neural network from scratch in Python to classify data from multiple datasets

Workout Scheduler App

- Developed an Android application using Java and SQL featuring user authentication, workout scheduling, and integrated YouTube search for relevant exercise demonstrations

Clubs & Activities**Robot Training Academy Coding Workshops**

July 2021 – Aug 2021

Rel8ted Analytics, St. Catharines, ON

- Learned new aspects of Python and machine learning, and completed various activities to earn microcredentials

Team Leader, SWC Robotics Team

Sept 2017 – June 2020

SWC Secondary School, St. Catharines, ON

- Strengthened communication and leadership skills by working through the robot design process with team members every year
- Periodically set goals for the team to work towards and kept detailed records of progress that had been made
- Led the team to the Ontario Provincial Championships all 3 years, one time earning a spot at the World Championships
